

Annual Report 2017/18

# **Our Mission**

To lead, promote, and enhance the production, value-added processing and utilization of Saskatchewan flax.

# **Our Vision**

Saskatchewan Flax Development Commission, as a respected organization, leads the promotion of flax and flax products in the world.

# About us

The Saskatchewan Flax Development Commission represents more than 5,600 flax producers in the province of Saskatchewan. We invest in research, communication and market facilitation activities to further develop the flax industry.

The Saskatchewan Flax Development Commission also works to promote production and valueadded processing of flax in the province. We partner with the flax industry and other agricultural organizations to ensure quality flax and flax products worldwide.

Canada is the world's largest producer and exporter of flax, with Saskatchewan processing four times as much as the next-closest flax growing province.

# **Chair Report**

As 2018 draws to an end and producers look back on 2018, one word comes to mind: "variable."

Between different regions in the province, and within each of our own farm operations, the harvest was extremely variable from field to field. Flax yields varied from the low teens all the way to high 40s or even 50s. On my operation alone there was 15 bushel difference between field to field. Harvestability of flax was extremely good and even after snow in mid-September the flax on my farm stood up very well.

Similarly, the state of the flax industry in 2017/18 was one of change.

The supply of flax from the farm has decreased dramatically in three years, from 900,000 tonnes in 2015 to 555,000 tonnes for the 2017/18 year, according to Statistics Canada. Canadian flax exports fell from 450,000 tonnes in 2016 to 350,000 tonnes in 2017. At the same time, production in the Black Sea region has increased, putting pressure on Canadian sales into Europe and China in part because of the lower transportation costs to move flax from the Black Sea into China and Europe. The relationships between Canadian companies and producers will remain key to maintaining sales to Europe and China.

In 2017/18 the Saskatchewan Flax Development Commission (SaskFlax) has taken on a larger role in research funding, agronomy, market development and national and international policy issues. In the spring of 2018 the federal government introduced the Canadian Agricultural

Partnership (CAP) program, which will fund research that was previously funded through the Growing Forward program. SaskFlax facilitated the development of research proposals on behalf of the flax associations to ensure research for flax continues.

Also impacting the role of SaskFlax in taking on more leadership for Canada's flax

"We invested over \$600,000 in 2017/18 into research, a figure that will increase over the next five years."

industry was a restructuring of the Flax Council of Canada (FCC) this past year. The organization has downsized significantly and the work it had been facilitating will be taken over in part by SaskFlax. This has also impacted funding options and abilities for the industry. Prior to CAP, the Flax Council of Canada had the ability to fund research but these recent changes have left SaskFlax as the significant funder of flax research. As a result we invested over \$600,000 in 2017/18 into research, a figure that will increase over the next five years.

In 2017/18, SaskFlax carefully watched the changing national landscape of the flax associations. As the FCC reduced its role in national activities there was also a change in activities in

representation in national policy and trade discussions. Over the past year SaskFlax has continued to work with the provincial and federal government to maintain and increase our reach as the voice for Saskatchewan flax producers. Over the course of 2017/18, SaskFlax became a member of the Canada Grains Council and the Grain Growers of Canada allowing us to further represent our industry in national discussions and promote the flax industry interests with the federal government and others. The membership at the Canada Grains Council was previously held by the FCC.

Last February, Michelle Beaith joined the SaskFlax staff as a Flax Agronomist. As the flax industry continues to grow, our Board determined it would be crucial to provide agronomy support to flax producers and to keep them up to date on the latest agronomy news and practices. Michelle will also serve as an additional avenue for communication with flax producers.

It is always with you, the flax producer and levy payer, in mind that our Board makes decisions. Our role is to continue to expand opportunities for our industry and to act on behalf of flax producers on a local, national and international scale. Our Board works extremely hard to make every levy dollar count as an investment into research, breeding, market development or advocacy issues.

I would like to thank our Board for their passion and many hours of work over the last year. In particular I would like to thank Dave Sefton and Erwin Hanley for their many years of experience, knowledge and wisdom. They are both finished their terms as of this year and they will surely be missed. We also welcome their replacements, Patricia Lung and Scott Sefton, and look forward to the new energy we are sure they will both contribute going forward.

Shane Stokke, Chair

# **Executive Director Report**

It was a busy year for us at the Saskatchewan Flax Development Commission (SaskFlax), with several new initiative taking place as well as structural changes.

Research funding is one of our main focuses, as it represents a core part of how your levy dollars are spent. In the second half of 2017, SaskFlax continued to work with other producer organizations and the Saskatchewan Ministry of Agriculture – Agriculture Development Fund.

This was also the final year of the federal government's Growing Forward 2 (GF2) program. While the flax research activities within GF2 were coming to an end, planning for research within the Canadian

Agricultural Partnership (CAP) program was taking place. SaskFlax lead the development of the

research activities for flax for the CAP program and also participated in the Diverse Field Crop Cluster program, in order to help strengthen research proposals that were of value to the flax industry. Research from this Cluster will take place from April 1, 2018 to March 31, 2023 and the outcome of all this research will be of significant benefits for flax producers in the coming years.

On top of all this, SaskFlax continued to fund variety development and agronomy research this past year, and continued to look at research proposals for food ingredients. The food market is still expected to be the area for growth in demand.

"The outcome of all this research will be of significant benefits for flax producers in the coming years." Our market development efforts continued into 2017/18 with the goal of increasing demand. SaskFlax participated in two trips to China to present at conferences about Canadian flax production and provide information about the benefits of flax for food and livestock. Both conferences, held in the major centre of Qingdao, provided good insight to the growth of flax demand in China. They were also an opportunity

for us to promote Canada as an important supplier and talk about the positives of Canadian flax and companies. This in increasingly important as we compete with the Black Sea region, which is seeing continual increases in flax production, as a supplier to China.

Over the past year, the Flax Council of Canada (FCC) saw a major restructuring. As a result of these changes, SaskFlax will take on more market development activities which were previously directed by the FCC.

SaskFlax also took on a larger national presence in the past year by becoming a member of the Grain Growers of Canada and Canada Grains Council. These memberships provide a strong voice for flax producers for national matters and they also strengthen our relationships with members of the federal government. Working with these national organizations is also important for developing research efforts and taking the flax message to Ottawa.

Once again, I thank each and every one of you for your ongoing support. Without you, none of this progress would be possible. As always I encourage you to get in touch with us if you have any feedback on the work we are doing.

## Wayne Thompson, Executive Director

# **Research Funding**

In 2017/18, SaskFlax allocated approximately 55% of its annual budget into research and development for the benefit of flax producers. Current priorities for research include: agronomy, variety development and pathology, seed and oil value-added processing, human health, and flax for livestock and pet diets.

Financial Statements **July 31, 2018** 

November 20, 2018

#### **Independent Auditor's Report**

#### To the Directors of Saskatchewan Flax Development Commission

We have audited the accompanying financial statements of Saskatchewan Flax Development Commission, which comprise the statement of financial position as at July 31, 2018 and the statements of operations, changes in net assets and cash flows for the year then ended, and the related notes which comprise a summary of significant accounting policies and other explanatory information.

#### Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

PricewaterhouseCoopers LLP 128 4th Avenue South, Suite 600, Saskatoon, Saskatchewan, Canada S7K 1M8 T: +1 306 668 5900, F: +1 306 652 1315

"PwC" refers to PricewaterhouseCoopers LLP, an Ontario limited liability partnership.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion.

#### **Basis for qualified opinion**

In common with many similar not-for-profit organizations, Saskatchewan Flax Development Commission derives revenue from producer check-off fees, the completeness of which is not susceptible to satisfactory audit verification. Accordingly, verification of these revenues was limited to the amounts recorded in the records of Saskatchewan Flax Development Commission. Therefore, we were not able to determine whether any adjustments might be necessary to producer check-off fees, excess of revenue over expenditures and cash flows from operations for the year ended July 31, 2018 and 2017, current assets as at July 31, 2018 and 2017 and net assets as at August 1, 2017, July 31, 2018, August 1, 2016 and July 31, 2017. Our audit opinion on the financial statements for the year ended July 31, 2017 was modified accordingly because of the possible effects of this limitation in scope.

#### **Qualified** opinion

In our opinion, except for the possible effects of the matter described in the basis for qualified opinion paragraph, the financial statements present fairly, in all material respects, the financial position of Saskatchewan Flax Development Commission as at July 31, 2018 and the results of its operations and its cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.

Notes to Financial Statements **July 31, 2018** 

### **1** Nature of business

The Saskatchewan Flax Development Commission (the "commission") was established by provincial legislation in April of 1996. The activities of the commission are funded primarily by a levy on Saskatchewan produced flax, which is collected by buyers at the time of sale.

The mandate of the commission is to promote and enhance flax production in Saskatchewan for maximum return to producers through research, market facilitation, leadership and communication in the industry.

## 2 Summary of significant accounting policies

a) Basis of presentation

These financial statements include the accounts of the commission and are presented in accordance with Canadian accounting standards for not-for-profit organizations ("ASNPO").

b) Use of estimates

The preparation of financial statements in conformity with ASNPO requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenditures during the reporting period. Actual results could differ from these estimates.

c) Tangible capital assets and website development costs

Tangible capital assets and website development costs are recorded at cost and amortized over their expected useful lives. Computer hardware, computer software and office equipment are amortized using the straight-line method over a five-year period. Website development costs are amortized using the straight-line method over a five-year period.

d) Revenue recognition

Producer check-off fees are recognized as product is sold from the producer to the buyer. Refunds are recognized using the accrual method based on actual requests submitted by producers for the crop year and are paid out subsequent to year-end by the commission.

The commission follows the deferral method of accounting for contributions, including grants. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured. Restricted contributions for expenses of the current period are recognized as revenue in the current period and restricted contributions for expenses of one or more future periods are deferred and recognized as revenue in the same period or periods as the related expenses are recognized. Notes to Financial Statements July 31, 2018

Interest income is recognized as it is earned. Contributions of materials and services are recognized only when a fair value can be reasonably estimated and when the materials and services are used in the normal course of the commission's operations and would otherwise have been purchased.

e) Grants and research projects

Expenditures are recognised when grants and research projects have been approved and the recipient has met eligibility criteria.

f) Financial instruments

Financial assets and financial liabilities, consisting of cash and cash equivalents, investments, accounts receivable and accounts payable and accrued liabilities are initially recognized at fair value and subsequent measurement is at amortized cost. The commission does not consider itself to have significant exposure to credit risk, currency risk, interest rate risk, liquidity risk, market risk or other price risk.

## 3 Restricted cash

Cash of \$nil (2017 – \$71,135) is restricted for the Northern Adapted Flax Variety Development research project.

## 4 Investments

Investments consist of guaranteed investment certificates which earn interest at rates ranging from 1.91% to 3.15% and mature in the 2019 (\$150,742), 2020 (\$375,868), 2021 (\$310,282) and 2022 (\$177,559) and 2023 (\$629,172) fiscal years.

## 5 Tangible capital assets

	Cost \$	Accumulated amortization \$	Net book value 2018 \$	Net book value 2017 \$
Office equipment	19,576	6,845	12,731	6,259
Computer hardware	8,279	6,387	1,892	422
Computer software	716	562	154	221
	28,571	13,794	14,777	6,902

Notes to Financial Statements July 31, 2018

## 6 Website development costs

Cost \$	Accumulated amortization \$	Net book value 2018 \$	Net book value 2017 \$
10,653	8,095	2,558	3,654

## 7 Internally restricted net assets

The commission has internally restricted net assets of \$700,000 to maintain operations and meet commitments in the event of crop failure, and to pay any amounts due in the event of disestablishment of the commission.

## 8 Related party transactions

During the year ended July 31, 2018 members of the commission's elected Board of Directors received payments for per diems and expenses of \$69,796 (2017 - \$67,898). All related party transactions described above are measured at the exchange amount, which is the consideration established and agreed to by the parties.

## 9 Commitments

As at July 31, 2018 the commission has committed to making the following payments for research projects:

	\$
2019 2020 2021 2022 2023 Thereafter	168,772 88,413 43,125 14,375
	314,685

## 10 Operating lease

The commission entered into a lease agreement for office space on November 1, 2017. The term of the lease agreement is 5 years and future monthly minimum lease payments, including occupancy costs, are \$1,626 to the end of the term of the lease on October 31, 2022. The commission has the option to renew the lease agreement for an additional three year term.

July 31, 2018

## 11 Budgeted amounts

The budgeted amounts have been approved by the Board of Directors, are unaudited and are provided for purposes of comparison.

## Statement of Expenditures
